by old, experienced planters, owning plantations, for sufficient funds to complete the crops now in and in course of being planted. Inquire of S. GILBERT, Southern Landonçe, 62 Broadway.

\$5,000; the annual premium on that sum is \$12.20; ten years premium is \$125; this sum deposited with the Company makes the insurance perpetual, without further payment of any kind.

When the property is sold, or the assured desires to abandon the insurance, he applies to the Company and receives back \$118 70 of the \$12, and the borgain is at an end.

The advantage of this method of insuring, in the case of dwellings, where permanent security is especially desirable, rendering unnecessary the constant wateritudiness now required, in order to prevent a policy from lapsing, at an unlacky moment, cannot if 10 be perceived and appreciated here, even more than chaswiere. The immense amount of dwelling property in this city forming, in many cases, the bulk of great estates, must find this system especially valuable for its permanency and activy.

When insurance mismency and activy.

When insurance momentines fail, and then property on which families depend for their nole support may disappear in an hour—once made, insurance by deposit need never to be renewed again, event there incursances call for its discontinuance.

It keeps alive without watching. Insurance by this.

be renewed again, except where circumstances cell for its discontinuance.

It keeps alive without watching. Insurance by this method is obviously cheaper as well as more secure. Thus, \$5,000 costs say \$12.50 per annum on a first class dwalling, while on \$125 (the amount to be deposited) the interest, as seven per cent is but \$8.75. If the risk runs in this way vow-years the Company gets \$5.75 per annum for insuring \$5,000, and at the end \$6.25 snore, being five per cent retained when the deposit is reclassed, making the average annual premit, \$2.50. We have no doubt that as fast as this simple and convenient system becomes understood it will so fully commend tackft to all fins rers of dwellings that few will tink of protecting the one of a six other plantering the convenient system of the working of this plan under every Full explanation.
